

EMPSON & CO.
Experience Italy in a Wine glass

Wild Vodka

This vodka is made from the distillation of organic soft wheat. The wheat is malted and goes through triple distillation, resulting in an extremely pure distilled liquor with a high alcohol content. Water is then added until the desired alcohol content is reached. During the entire process, the raw materials and the unfinished product are stored in stainless steel containers. In fact, all of the work is carried out using equipment made of stainless steel.

Spirit exported to: USA

Distillery & Aging

Category:

Vodka

Still type:

Copper still

Distillation System:

Slow craft distillation, through a steam and copper distillation system. Every single distillation lasts 9 hours and is repeated 3 times to obtain the purest quality possible.

Vintage:

Non-Vintage

Closure:

Natural Cork with plastic heading
